

NISC Stakeholder meeting  
January 16, 2008  
Meeting Notes

**Chuck Whitaker introduction presentation**

**Larry Sherwood – roll call.**

Lots of missing people. About 30 total, of which ~10 are Solar ABCs-related

How does organic PV fit into existing standards, how can we drive new standards to accommodate new technologies.

Lots of general interest in IEEE and IEC and “standards”.

**Tom Basso – IEEE SCC21**

No Standards development activities going on in IEEE

Eichner: 1547 is being offered to IEC TC8, how will that be coordinated with TC82, CENELEC, etc.?

**Howard Barikmo – TC82**

What’s going on with 61646? What comments have been received?

CEC : looking for Performance standards. Need input (module and inverter performance) data for performance calculations

**Carl Osterwald - ASTM**

Originally a lot of participant overlap between E44.09, SCC21 and especially US TAG.

How do we get involved in the various standards.

**Alex Mikonowicz – US TAG**

Joint meetings--could see the documents and sit around and work on them. Everyone would have the opportunity to work on them.

Feedback from the industry on what standards should be developed.
